

Subject: Biology and Environmental Science (CY202)

Question Bank

Unit 2: Cells and Biomolecules - Function

Short questions:

1. What are vaccines? Give two examples.
2. Write the full form of HIV and AIDS.
3. Write down any two applications of enzyme.
4. What are the different ways of enzyme inhibition?
5. Name the disease that appears due to the deficiency of Vitamins
6. Name the disease that appears due to the deficiency of Calcium and iodine.
7. Write down any two advantages of Bioenergy.
8. What are biofertilizers?
9. What are pesticides?
10. Give two examples of Insecticides and herbicides and rodenticides.
11. What do you mean by biological pest control?
12. What are steroids and corticosteroids. Name two from each. What are the uses of them.
13. Mention the common uses of different medicinal plants.
14. Write down any two importance of medicinal plants in modern healthcare.

Broad questions:

1. What are enzymes? Discuss their structure, characteristics, and significance as biocatalysts in biological processes.
2. Define Fermentation. Discuss the different steps of Fermentation.
3. Define Bioenergy. What are the different forms of Bioenergy? Write down the different production processes of Bioenergy. What are the different challenges of Bioenergy.
4. What is photosynthesis? Discuss the different steps involved in photosynthesis.
5. What are biofertilizers? How does the biofertilizers are applied? Write down the advantages challenges of Biofertilizers.
6. What are pesticides? Write down four advantages and four disadvantages of pesticides.
7. What are Steroids? Discuss the function of different kind of Steroids. Write down the different biological functions of Steroids.
8. Define Vaccines. How does Vaccines work. Write down the importance of vaccines.
