

Subject: Biology and Environmental Science (CY202)

Question Bank

Unit 3: Structure and Function of Ecosystem

Short questions:

1. Define ecosystem.
2. Mention the types of components of the ecosystem with examples.
3. What are the levels of organization in the ecosystem? Mention the hierarchy.
4. What do you mean by environmental sustainability.
5. Arrange the following in correct order of organization: population, community, individual, ecosystem, biosphere, biome.
6. What are NPP and GPP? What is their relation?
7. State the laws of thermodynamics followed in energy flow in ecosystem.
8. Which biogeochemical cycle does not directly involve air or atmosphere.
9. What is food chain? Explain in brief with schematic diagram.
10. What do you mean by nitrogen fixation?
11. What do you mean by nitrification in nitrogen cycle?
12. What do you mean by assimilation in nitrogen cycle?
13. What do you mean by ammonification in nitrogen cycle?
14. Write down four importance of nitrogen cycle.
15. What do you mean by weathering in Phosphorus cycle?

Broad questions:

1. Discuss the biotic components of the ecosystem and their organization.
2. Discuss in details, about the functions of the ecosystem.
3. What are trophic levels? Discuss each trophic level with example.
4. How does energy flow in ecosystem. Discuss elaborately.
5. Discuss the carbon cycle in details.
6. Describe the processes involved in nitrogen cycle.
7. Discuss environmental assessment impact.
8. Discuss the Phosphorus and Sulfur cycle.
9. Describe the Oxygen cycle.
10. What do you mean by Tolerance Curve? Draw the Tolerance Curve and explain each part of the curve.
